OUTDOOR

Mehr Komfort, mehr Sicherheit – die neuen Funktionen unserer Außenleuchten.

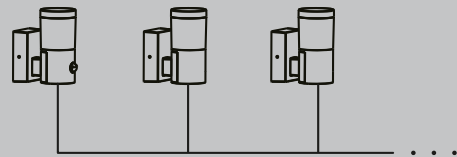

More convenience, more safety - the new functions of our outdoor lights.

MOTION SENSOR MULTICONTROL

Der integrierte Bewegungssensor der Hauptleuchte kann eine bestimmte Anzahl weiterer Leuchten mitsteuern. Die zusätzlichen Leuchten empfangen das Signal der Hauptleuchte und benötigen daher keinen eigenen Sensor.

The integrated motion sensor of the main light can also control a certain number of additional lights. The additional lights receive the signal from the main light and therefore do not require their own sensor.

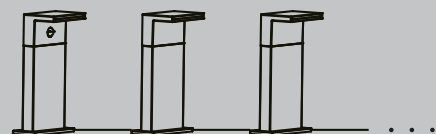

max. 8 pcs.

CONNECTOR BOX

Der Anschlusskasten dieser Leuchten ist so ausgelegt, dass er zwei Anschlussleitungen aufnehmen kann. Dadurch lassen sich mehrere Leuchten problemlos in Reihe schalten.

The connection box of these lights is designed to accommodate two connection cables. This means that several lights can be easily connected in series.

max. 8 pcs.

Robuste Außenleuchten für Küstenregionen

Robust outdoor lights for coastal regions

Leuchten, mit dem Label „Seaside Ready“, sind die perfekte Wahl für alle, die in maritimen Umgebungen leben. Dank hochwertiger Materialien und spezieller Oberflächenbeschichtungen trotzen sie selbst den härtesten Bedingungen an der Küste. Salzhaltige Luft und wechselnde Witterung können diesen Leuchten nichts anhaben.

Luminaires with the "Seaside Ready" label are the perfect choice for anyone who lives in a maritime environment. Thanks to high-quality materials and special surface coatings, they can withstand even the harshest conditions on the coast. Salty air and changing weather conditions are no match for these lights.

10 Jahre Garantie auf Korrosionsschutz bei Leuchten aus pulverbeschichtetem Aluminium. Ausgenommen sind Ausbleichen der Oberfläche sowie technische Komponenten.

10-year guarantee on corrosion protection for luminaires made of powder-coated aluminum. This excludes fading of the surface and technical components.

15 Jahre Garantie auf Korrosionsschutz bei Leuchten aus feuerverzinktem Edelstahl. Ausgenommen sind Ausbleichen der Oberfläche sowie technische Komponenten.

15-year guarantee on corrosion protection for luminaires made of hot-dip galvanized stainless steel. This excludes fading of the surface and technical components.

Bewegungssensor Multi-Control

Der integrierte Bewegungssensor der Hauptleuchte kann eine bestimmte Anzahl weiterer Leuchten mitsteuern. Die zusätzlichen Leuchten empfangen das Signal der Hauptleuchte und benötigen daher keinen eigenen Sensor.

Multi-Control motion sensor

The integrated motion sensor of the main light can also control a certain number of additional lights. The additional lights receive the signal from the main light and therefore do not require their own sensor.

Capteur de mouvement Multi-Control

Le capteur de mouvement intégré du luminaire principal peut également commander un certain nombre de luminaires supplémentaires. Les luminaires supplémentaires reçoivent le signal du luminaire principal et n'ont donc pas besoin de leur propre capteur.

Multi-Control bewegingssensor

De geïntegreerde bewegingssensor van de hoofdlamp kan ook een bepaald aantal extra lampen aansturen. De extra lampen ontvangen het signaal van de hoofdlamp en hebben dus geen eigen sensor nodig.

Sensor de movimiento Multi-Control

El sensor de movimiento integrado de la luz principal también puede controlar un cierto número de luces adicionales. Las luces adicionales reciben la señal de la luz principal y, por tanto, no necesitan su propio sensor.

Sensore di movimento Multi-Control

Il sensore di movimento integrato nella luce principale può controllare anche un certo numero di luci aggiuntive. Le luci supplementari ricevono il segnale dalla luce principale e non necessitano quindi di un proprio sensore.

Senzor de mișcare Multi-Control

Senzorul de mișcare integrat al luminii principale poate controla, de asemenea, un anumit număr de lumini suplimentare. Luminile suplimentare primesc semnalul de la lumina principală și, prin urmare, nu au nevoie de un senzor propriu.

Multi-Control liiketunnistin

Päävalon integroitu liiketunnistin voi ohjata myös tiettyä määrää lisävaloja. Lisävalot saavat signaalin päävalosta, joten ne eivät tarvitse omaa tunnistinta.

Czujnik ruchu Multi-Control

Zintegrowany czujnik ruchu głównego światła może również sterować pewną liczbą dodatkowych świateł. Dodatkowe światła odbierają sygnał z głównego światła i dlatego nie wymagają własnego czujnika.
